Wiederverwendung von Planeten Teilen

A 3D rendered scene set in a dark space environment filled with stars. In the center, there is a cluster of various geometric shapes including yellow cubes, a green cube, white and red cubes, and yellow pyramids. To the left, a white dolphin-like creature is swimming. Several yellow bananas are scattered throughout the scene. A bright, hazy nebula or comet tail is visible on the right side. The overall aesthetic is that of a simple 3D game or simulation.

Ziel Damage – Zerstörung

Bounding Spheres

Dynamische Neuberechnung - Interobjektkollision
