VRST 2019

Call for Papers and Sponsors

Important Dates

July 19, 2019 (23:59 AoE)   Papers with all material submission

August 15, 2019 (23:59 AoE)   Posters and demos submission

September 15, 2019 (23:59 AoE)   Author notification for papers, posters and demos

September 22, 2019 (23:59 AoE)   Camera-ready papers, posters, and demos

November 12-15, 2019   Conference in Sydney, Australia

Papers

• Programs Chair

> Thierry Duval, France   > Yuichi Itoh, Japan
> Torsten Kuhlen, Germany   > Shigeo Morishima, Japan
> Huyen Nguyen, Australia

✉ papers2019@vrst.acm.org

• Submission Information

The deadline for long/short paper submissions is July 19, 2019 (23:59 AoE). Use the ACM SIGCHI Conferences Submission System to submit your work: https://new.precisionconference.com/~sigchi

Any documents on arXiv are ignored. And it is allowed for authors to submit any documents that have been already written in other language than English (even if they are journal articles in other language.)

• **Paper Format**

Paper submissions should be anonymous and prepared in the "ACM Standard" format, also known as the "SigConf" format.

Word and LaTeX templates for the "ACM Standard" / "SigConf" format can be found inside the official 2017 ACM Master article template packages: www.acm.org/publications/proceedings-template

The maximum length for a 'full paper' submission is 10 pages. The maximum length for a 'short paper' submission is 4 pages. 2-column "teaser" figures on the front page are allowed. The maximum length of submissions DOES NOT include "Reference."

• **Supplementary Materials**

Submissions may be (optionally) accompanied by additional materials such as images, videos, or electronic documents. These materials do not form a part of the official submission. They will be viewed only at the discretion of the reviewers. All content should be in a portable format that is unlikely to require the user to download additional programs (for example, you may prefer PDF or HTML for documents, PNG or JPEG for images, and QuickTime or MPEG for video). The total file size for supplementary materials should not exceed a total of 50MB.

To the extent possible, accepted papers should stand on their own, with the additional material providing supplementary information or confirmation of results. It is, however, appropriate to refer to video footage in the paper.

• **Anonymity Guidelines**

Please remove author and institution information from the author list on the title page, remove author information from all paper headers, and remove from the text any clues that would directly identify any of the authors. Please anonymize your PDF file. Note that PDF creator programs may automatically include author information in the file metadata.

Citations of your own published work (including online) must be in the third person, in a manner that is not traceable to the identity of the authors. For example, the wording "in [3], Mountain and River have proposed…" is acceptable, whereas "in [3], we have proposed…" is not. (Where reference [3] is listed explicitly as "Mountain, A. and River, A., Detecting Mountains and Rivers, In Proc. UIST '16, 721–741.")

Failure to comply with the above requirements will result in automatic rejection of the paper.

• **Attendance**

Paper acceptance is always conditional on at least one author registering for the conference and presenting the work in person.

• **Invitation to journal / SIGGRAPH**

Computers and Graphics (CAG) Journal could invite 2 or 3 best papers from VRST 2019, but authors should submit their extended version after conference (with 30%+ new materials). Selected best paper will also be invited to present as postern in 2019 SIGGRAPH ASIA in Brisbane.

Posters

• **Programs Chair**

> Martin Masek

> ✉ posters2019@vrst.acm.org

• Call for Posters

The 2019 ACM Symposium on Virtual Reality Software invites prospective authors to submit poster papers (2 pages). All accepted posters will be included in the conference proceedings and in the conference program for a presentation in a dedicated session.

• Submission Information

The deadline for poster submissions is August 15, 2019 (23:59 AoE). Use the ACM SIGCHI Conferences Submission System to submit your work: https://new.precisionconference.com/~sigchi

• Poster Format

Poster submissions should be anonymous and prepared in the "ACM Standard" format, also known as the "SigConf" format. Word and LaTeX templates for the "ACM Standard" / "SigConf" format can be found inside the official 2017 ACM Master article template packages:https://www.acm.org/publications/proceedings-template

• Anonymity Guidelines

Please remove author and institution information from the author list on the title page, remove author information from all paper headers, and remove from the text any clues that would directly identify any of the authors. Please anonymize your PDF file. Note that PDF creator programs may automatically include author information in the file metadata.

Citations of your own published work (including online) must be in the third person, in a manner that is not traceable to the identity of the authors. For example, the wording "in [3], Mountain and River have proposed…" is acceptable, whereas "in [3], we have proposed…" is not. (Where reference [3] is listed explicitly as "Mountain, A. and River, A., Detecting Mountains and Rivers, In Proc. UIST '16, 721-741.")

Failure to comply with the above requirements will result in automatic rejection of the paper.

• Attendance

Paper acceptance is always conditional on at least one author registering for the conference and presenting the work in person.

• Guidelines for Presenters

We have two poster sessions preceded by a fast forward session, where in 30 seconds you need to introduce your work. You need to prepare one slide and send it to the poster chair a day prior to the poster session. Please put up your posters in the morning so delegates will be able to see them prior to poster session. We will provide stickers for attendees using to vote for best poster. Final decision for a best poster is made by the poster chair. Please be present at your poster during the whole poster session. We announced your poster session in the online program.

Demos

• Demos Chairs

> Richard Skarbez (La Trobe)
> Anton Bogdanovych (Western Sydney University)

> ✉ demos2019@vrst.acm.org

• Call for Demos

The 2019 ACM Symposium on Virtual Reality Software and Technology seeks hands-on demonstrations sharing novel interactive technologies and experiences among the VR community. We encourage demonstrations of novel and innovative prototypes, devices, interaction techniques or systems from any area of virtual reality that are presentable in a conference setting.

• Submission Information

The deadline for poster submissions is August 15, 2019 (23:59 AoE). Use the ACM SIGCHI Conferences Submission System to submit your work: https://new.precisionconference.com/~sigchi

• Demo Format

Demo submissions should include a two-page extended abstract describing the demo, as well as a video of the demo and a requirements document. The extended abstract should provide figures showing an overview of the demo; as well as a technical description of the demo, explaining its novelty, usefulness, applications, and how the audience can interact with it. The extended abstracts will be indexed and published in the ACM Digital Library.

Extended abstracts should be anonymous and prepared in the "ACM Standard" format, also known as the "SigConf" format. Word and LaTeX templates for the "ACM Standard" / "SigConf" format can be found inside the official 2017 ACM Master article template packages:www.acm.org/publications/proceedings-template

Authors should also submit a short video (no longer than 5 minutes) showing their demo, in MP4 format using the H.264 codec.

The requirements document should describe the demo's hardware setup, the size, and space requirements in detail. The conference will provide basic infrastructure, like a table and power, and space either with daylight or in a dark room.

• Attendance

Paper acceptance is always conditional on at least one author registering for the conference and presenting the work in person.

• Guidelines for Presenters

Each paper has an half an hour time slot. It is up to you how much time you want to leave for questions, but we generally recommend at least 5-10 minutes for the discussion. Please contact the session chair prior to commencement of your session and test your equipment.

Support for Student Presentations

The SIGCHI Student Travel Grant (SSTG) program is intended to enable students who lack other funding opportunities to attend SIGCHI-sponsored or co-sponsored conferences. This travel grant is intended to support students whose intention is to present at a SIGCHI-sponsored conference, not just attend. Details can be found at: sigchi.org/conferences/funding/student-travel-grant.
